EDUCATION

Higher School of Engineering and Technological Studies – Tunis
National Diploma of Engineering in Computer Science

Graduated June 2025

Higher Institute of Technological Studies - Kelibia
Bachelor's Degree in Information Technology

Graduated June 2022

PROFESSIONAL EXPERIENCE

ATLARGE – FullStack Developer - [Atlarge](#)

February 2026 – Now

- Developed and maintained backend services across several Symfony applications by implementing and fixing RESTful API endpoints, third-party integrations (Marketo, Elasticsearch, Redis), admin dashboards, and data-processing workflows, while resolving production issues and improving performance.
- Contributed to multiple WordPress builds by developing custom Beaver Builder modules, building and fixing front-end components (carousels, sliders, responsive layouts), and resolving plugins and template-level bugs to meet client requirements.
- Worked across various WordPress plugins, including custom in-house and third-party plugins, implementing new features and fixing issues.
- Managed complex GitLab branching and code reviews, orchestrated local environments with Lando and Docker, wrote automated tests with PHPUnit, and translated Active Collab tasks and Loom walkthroughs into shipped, documented features.
- Helped shape project decisions alongside the team across regular meetings in an Agile environment, and partnered with cross-functional colleagues to turn business requirements into secure, maintainable technical solutions.

Internship – [Atlarge](#)

December 2025 – January 2026

- Integrating into an agile team environment.
- Investigated and resolved technical issues, preparing comprehensive reports and analyses for internal projects.
- Collaborated on various team tasks and feature maintenance.

YooScriptDigitalSolution – Final Year Intern - Project: [MS-LEARNING](#)

February 2025 – June 2025

- Designed and developed a full-stack E-Learning web platform from scratch.
- Developed a RESTful API for managing courses and users, and implemented secure JWT authentication.
- Built a dynamic, interactive user interface using React.js.
- Established a complete DevOps infrastructure (Docker, CI/CD, ELK) to automate and monitor the application lifecycle.
- Integrated a Python-based AI service (Whisper) for video content analysis and transcription.

Summer Internship – Project: [E-COMMERCE](#)

July 2024 – August 2024

- Developed and implemented a complete e-commerce solution including catalog, cart, and order management.
- Designed and built a robust back-office to manage products, users, and orders.
- Implemented customer authentication and integrated the Stripe payment solution.

BNS ENGINEERING - Bachelor's Final Year Intern - Project: [BRNSMART TRAINING CENTER](#)

February 2022 – June 2022

- Designed and developed a comprehensive training management platform.
- Built a back-office in WordPress for managing registrations, accounts, and payments.
- Programmed dynamic management logic with PHP/MySQL for authentication and forms.
- Developed interactive dashboards for activity tracking and created public/private interfaces.

SKILLS

- Languages:** PHP, JavaScript, HTML, CSS.
- Frameworks & Libraries:** Symfony, ReactJs, Twig, Beaver Builder.
- CMS:** Wordpress, Drupal.
- DevOps & Tools:** Docker, Lando, CI/CD, Git, GitHub, ELK, Linux.
- Databases:** MySQL.
- Methodologies:** Scrum.

DISTINCTIONS/CERTIFICATIONS

- [Ranked in the top 1% in the Symfony skills test on the WeLoveDevs platform.](#)
- [Scrum Fundamentals Certified \(SFC™\).](#)
- [EFSET English Certificate 70/100 \(C1 Advanced\).](#)
- [Cisco English for IT1 Certificate issued by Cisco.](#)
